EDUCATION

University of Michigan, Ann Arbor, MI Graduated April 2026
Master of Science in Environment and Sustainability

- Concentration: Geospatial Data Science, Ecosystem Science and Management

University of Michigan, Ann Arbor, MI Graduated April 2024
Bachelor of Science in Environmental Science and Computer Science

- Concentration: Conservation Ecology

PROFESSIONAL EXPERIENCE

Ann Arbor YMCA Camp AGQ **Ann Arbor, MI**
Master's Capstone Consultant September 2024 - May 2026

- Created a 50+ page physical and digital guide for educating campers, staff, and alumni about the nature and ecology of the summer camp property, communicating technical information to audiences of various knowledge levels.
- Conducted remote sensing capture, geospatial analysis, and field data collection to document the quantitative data and qualitative characteristics of the property and develop custom maps, cartographic products on behalf of the YMCA.
- Used ArcGIS Pro and Adobe Photoshop to create species-identification visualizations and environmental infographics.
- Facilitated monthly meetings with high-level YMCA staff on the direction and contents of the product.

University of Michigan **Ann Arbor, MI**
Graduate Student Instructor - Woody Plants September 2025 - January 2026
Teaching Assistant September 2024 - January 2025

- Led weekly five-hour field labs for undergraduate and graduate students, teaching the identification of over 150 Michigan woody plant species.
- Managed course logistics, including materials, quizzes, assignments, exams, grading, and student support.
- Maintained student safety and engagement during field-based instruction and hands-on ecological learning.

University of Michigan **Ann Arbor, MI**
Graduate Student Instructor - Restoration Ecology September 2024 - January 2025

- Facilitated weekly outdoor classes for over 20 graduate students involving restoration practitioners.
- Managed course logistics, graded assignments, and maintained the class' online resources.

Greenhills School **Ann Arbor, MI**
Robotics Instructor January 2023 - March 2026

- Guided a diverse team of over 50 high school students in designing, constructing, and programming competitive robots for the FIRST Robotics Competition.
- Facilitate teamwork and positive communication, strengthening students' engineering and social skills.
- Nominated for the FIRST Robotics Competition Woodie Flowers Award for excellence in mentorship, communication, and student inspiration.

RELEVANT COURSEWORK & SKILLS

Coursework: Remote Sensing, Ecosystem Management, Environmental Spatial Analysis, Restoration Ecology, Web Design, Data infrastructure, Forest Ecology, Conservation Ecology.

Skills: ArcGIS Pro, ArcGIS Online, ArcGIS Server, SQL, QGIS, geospatial analysis, cartographic design, map development and management, web GIS, online GIS resource management, GPS, and field data collection.

Professional: Leadership, consulting, team management, environmental education, technical instruction.
